

I am a resident of the state of Wisconsin and have added my name to it's No Call List for the last four years. I do not want my state's law regarding unwanted telephone calls changed in any way. It is purposely strong and that is the way the people of Wisconsin want it. Do not let a group of bankers change what millions of citizens of my state have voted with their sign-up that they want. Banks already have many ways to advertise their business without disturbing out peace at home. Do not allow them to change what we in Wisconsin want. The millions of us who are on this list are telling you something.
